What the State Chemist of Maryland Writes About ALTAMONT SPRING WATER

CHEMICAL DEPARTMENT
of the
MARYLAND AGRICULTURAL COLLEGE
Office of
DR. H. B. McDONNELL, State Chemist.
College Park, Md., Aug. 31, 1907.

Col. Geo. Truesdell,
Deer Park, Md.
Dear Sir:—In regard to my recent inspection of the spring and bottling house of the Altamont Spring Water Company I beg to say that I was surprised to find the plant so large, so complete and so elaborately equipped. The spring is protected by a neat and substantial stone house, the stone being laid in cement, making a perfectly tight wall. The windows are protected by fine brass wire gauze, in addition to shutters and iron gratings, giving ventilation but excluding all insects. A cement pavement completely surrounds the spring house, giving additional protection.

The water flows by gravity from the spring to the bottling house through a pipe from which the bottles are filled without interrupting the natural flow. The large bottling house is a model of its kind. The cases of empty bottles pass from the car, on the railroad siding, to the soaking and washing room, almost entirely by gravity, to the large soaking machine in which the bottles are automatically passed through two cleansing solutions of soda in which they remain for about twenty minutes. From this they go to the rinsing tank and then to the washing machine, where they are thoroughly washed by revolving brushes, both inside and out, under a constant stream of spring water.

From the washing machine they pass to the sterilizing and filling room. They are sterilized for twenty minutes by steam under pressure in large copper sterilizers of special construction. During the sterilization a stream of boiling water is allowed to play inside of each bottle. After removal from the sterilizers the bottles are allowed to cool for a few minutes and are filled from the constantly-flowing water, as above stated. During the sterilization and cooling the bottles are kept inverted the more perfectly to exclude all germs, should any be present in the air. This, however, would seem to be almost impossible on account of the special system of ventilation. Special ducts draw the air from the top and bottom of the room while the entering air is filtered through fine cloth filters.

Immediately after filling the bottles are capped with "Crown" corks, to which has been added, however, a special silver-like lining to perfectly protect the water from the cork.

The bottles are next labelled in a special machine, inspected and placed in cases holding one dozen each, when a slight push from the hand of the operator rolls each case, as filled, on the automatic conveyor on which they pass to the cars without further attention.

The perfect water and your peerless arrangements for keeping it as till it gets into the hands of the consumer will certainly create a large demand when the facts are half known by critical buyers.

Very truly yours,
H. B. McDONNELL.

Afraid of Ghosts

Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terrors it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink. The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a hollow cheek, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. It increases the vital power, cleanses the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. Golden Medical Discovery contains no alcohol, whiskey or habit-forming drugs. All the ingredients printed on its outside wrapper. It is not a secret nostrum but a medicine of known composition and with a record of 40 years of cure. Accept no substitute—there is nothing "just as good." Ask your neighbors.
